graduated in July 2025 with a 2:1 BSc in Computer Science, I am open to various opportunities and willing to work hard and progress alongside a forward-thinking company. Ideally, I would like to gain employment in a Full Stack Developer or data analytics position, as I have particularly enjoyed the modules around this position throughout my degree.

Projects:

Dissertation Project – Developed a Web application using Razor Pages (ASP.NET) that enables users to participate in quizzes and gain achievements. This was developed to show how users can be engaged in computing topics with the use of gamification.

Dissertation Enrollment System – For the Experiential Module, My group designed and developed a web application which enables students to apply for their dissertation topics based on their most preferred topics to least. SQL, JavaScript, HTML and CSS was implemented.

Education & Qualifications:

Chester University 2022 – Present

BSc (Hons) Computer Science – **Grade 2:1**

Key Skills:

Additional Information:

Hobbies & Interests:

I enjoy spending time with family and friends. I play and follow football regularly and represent the University in hockey. I have a major interest in IT, computers and games consoles for coding, website design/development and gaming on all platforms.

During the initial coronavirus (Covid-19) pandemic lockdown period, I became a keen cyclist and continue to ride on a regular basis.
